Redwood City, CA (Open to Relocate) | 949-522-2384 | vishakha.jain53@gmail.com | linkedin.com/in/vishakha-jain

PROFESSIONAL SUMMARY

Public health program and research professional with **6 years** of experience executing quantitative and qualitative research and technical writing for various public health initiatives, combining program evaluation and cross-functional coordination with community and federal stakeholders. Directed evaluation metrics and reporting for a COVID-19 relief program and a Medicare value-based care model, informed federal policy on the impact of a COVID-19 program on rural and underserved communities through issue briefs and technical reports, and led a mixed-methods research study across **7 international markets**. Skilled in community-engaged research coordination and translating complex data into scientific reports, technical assistance materials, and policy recommendations.

PROFESSIONAL EXPERIENCE

Acumen LLC

Burlingame, CA

Lead Research Analyst – Public Health Program Evaluation & Mixed-Methods Research

08/2023 – 07/2026

- Coordinated program evaluation and mixed-methods research for a COVID-19 relief program (HRSA-PRF) and a Medicare value-based care model (BPCI-A), keeping **3+** concurrent workstreams on scope, schedule, and budget while designing evaluation frameworks, protocols, and data collection tools.
- Identified approximately **\$9M** in potential fraud through quantitative program oversight analysis of a large-scale administrative claims database using SQL, delivering an evidence-based report to the Office of Inspector General (OIG) that informed corrective action.
- Informed federal policy affecting rural and underserved communities during COVID-19 by translating program findings into issue briefs, scientific reports, and recommendations for Directors and senior officials.
- Delivered on-schedule quarterly and monthly performance reports to participating ACOs through strategic planning and cross-functional stakeholder collaboration.
- Served as primary liaison between internal teams and external federal stakeholders and policymakers, authoring client-ready memos, technical assistance materials, and executive reports that informed program and policy decisions.
- Led quality improvement efforts by mentoring **3+** team members and building an agile quality control (QC) workbook to standardize evaluation methods and reporting standards.
- Contributed technical writing and proposal development to **3+** federal funding submissions, one of which was successfully awarded.

Cerner Enviza

Singapore, SG

Senior Market Research Analyst – Quantitative & Qualitative Research

10/2022 – 07/2023

- Managed full project lifecycle for a quantitative research study to understand the awareness of COVID-19 antibodies across **7 international markets**.
- Conducted qualitative research to assess point-of-care (POC) diagnostic device awareness in Japan and Indonesia, developing discussion guides and synthesizing findings into strategic recommendations for cross-functional stakeholders.
- Informed a regulatory-compliant launch strategy for an ophthalmology drug in Australia by developing qualitative discussion guides and synthesizing secondary research on the national healthcare system.
- Delivered actionable insights that shaped strategy for oncology and anticoagulant portfolios through end-to-end quantitative studies on engagement effectiveness and brand tracking.

Syneos Health

San Francisco, CA

Strategy Consultant – Applied Research & Program Analysis

11/2020 – 09/2022

- Directly informed go-to-market strategy for women's health indications by identifying strategic gaps through SWOT and root cause analysis.
- Led commercial due diligence across **100+** assets in urology, nephrology, and rare disease portfolios, evaluating clinical trial data and recommending **39** high-value opportunities to senior leadership.

Adivo Associates

San Francisco, CA

Associate Consultant – Competitive Intelligence & Market Research

11/2019 – 08/2020

- Informed international market-entry strategy by synthesizing primary and secondary research to map the rare disease landscape (immunology, rheumatology, neurology) in Sweden.
